Black belt
Japanese Jiu-Jitsu (self-defence)

Daniel Muñoz de la Cámara

Geospatial Information Technologies student
Earth Observation, Remote Sensing and GIS

Profile

Final-year student in Geospatial Information Technologies at Universidad Politécnica de Madrid. I am especially interested in Earth Observation: turning satellite data into useful information about land and the environment. Looking for internships at geospatial and Earth Observation companies.

Education

Bachelor's Degree in Geospatial Information Technologies Engineering — 2020 - 2027 (expected)
Universidad Politécnica de Madrid, School of Surveying, Geodesy and Cartography Engineering
Key courses: Applied Remote Sensing, Time Series Analysis, Thematic Cartography, Geospatial Web Application Development, Spatial Databases.

Projects

Habitat suitability of the loggerhead sea turtle (Caretta caretta) in the Mediterranean — In progress
Modeled habitat suitability zones by integrating species distribution data with satellite-derived chlorophyll-a as a water-quality indicator.
Python, Google Earth Engine, Sentinel-2, spatial analysis

Time series of Arctic and Antarctic sea ice extent — Completed
Conducted statistical modeling of polar sea ice evolution using satellite data to detect long-term trends and seasonality.
R, ARIMA, time series, satellite data

Tourism web app for Castilla y León — Completed
Co-developed and presented an interactive geospatial tourism web application integrating spatial data and web GIS tools.
HTML, CSS, JavaScript, web GIS

Experience

Waiter and lifeguard — 2021 - present
Jowke, Madrid, weekends
Customer service in a high-demand environment for over four years at the same company. The company has also relied on me as a lifeguard on 5 occasions, taking responsibility for guest safety.
